

● Arena geometry ○ Poles (filled: the labelled one) ✕ Model's estimate, shaded $\pm\sigma$

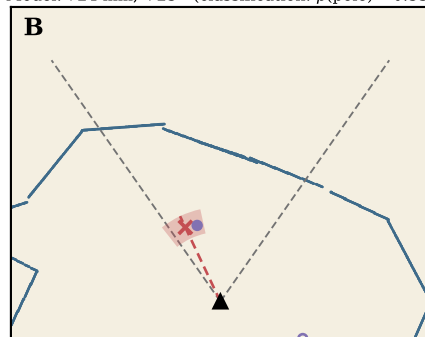

Pole at 326 mm, $+10^\circ$

Model: 344 mm, -3° (classification: $p(\text{pole}) = 0.65$)

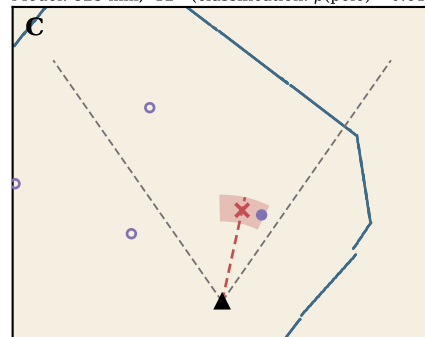

Pole at 690 mm, $+17^\circ$

Model: 724 mm, $+25^\circ$ (classification: $p(\text{pole}) = 0.53$)

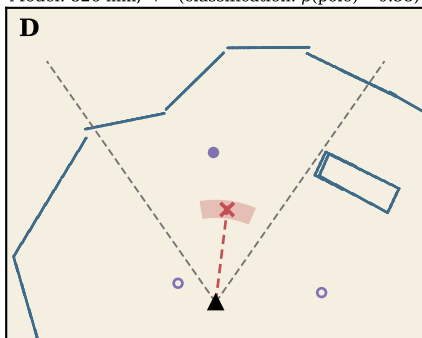

Pole at 828 mm, -25°

Model: 825 mm, -12° (classification: $p(\text{pole}) = 0.61$)

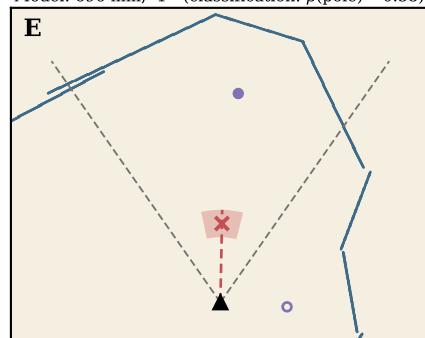

Pole at 1311 mm, $+1^\circ$

Model: 826 mm, -7° (classification: $p(\text{pole}) = 0.58$)

Pole at 1838 mm, -5°

Model: 696 mm, -1° (classification: $p(\text{pole}) = 0.58$)

Pole at 2398 mm, -29°

Model: 761 mm, -2° (classification: $p(\text{pole}) = 0.53$)
