

● Arena geometry ○ Poles (filled: the labelled one) ✕ Model's estimate, shaded $\pm\sigma$

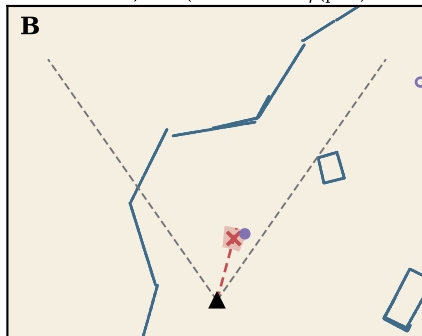

Pole at 492 mm, -5°

Model: 585 mm, -16° (classification: $p(\text{pole}) = 0.93$)

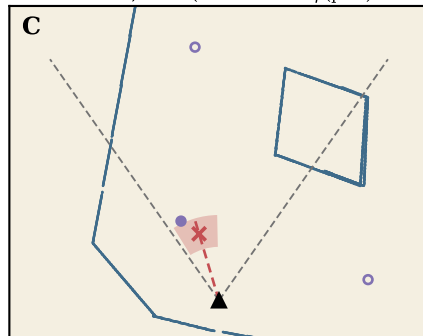

Pole at 626 mm, -23°

Model: 567 mm, -15° (classification: $p(\text{pole}) = 0.93$)

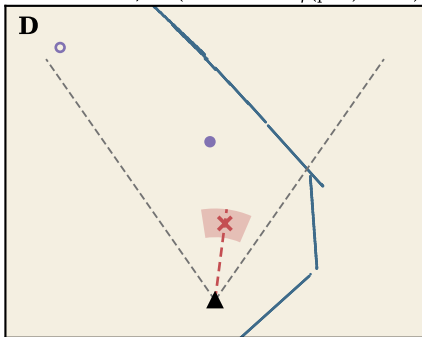

Pole at 765 mm, $+26^\circ$

Model: 615 mm, $+17^\circ$ (classification: $p(\text{pole}) = 0.71$)

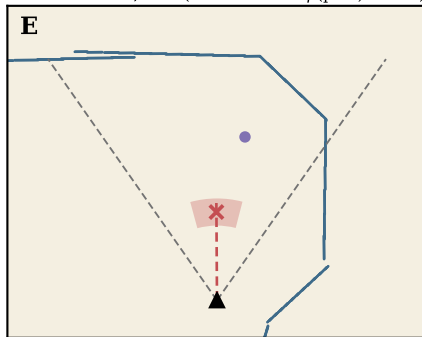

Pole at 1389 mm, $+2^\circ$

Model: 684 mm, -7° (classification: $p(\text{pole}) = 0.63$)

Pole at 1451 mm, -10°

Model: 780 mm, $+0^\circ$ (classification: $p(\text{pole}) = 0.52$)

Pole at 2177 mm, $+11^\circ$

Model: 863 mm, -5° (classification: $p(\text{wall}) = 0.54$)
